GENERALIZED SYSTEM OF PREFERENCES

Scheme of the United States of America

Announcement

1. The Office of the Special Representative for Trade Negotiations of the United States Government recently published information amending the scheme of the United States with effect from 1 July 1991. 1/ While the UNCTAD secretariat has been advised that this publication does not have legal effect, it provides information intended to facilitate public understanding of the current United States scheme.

2. The following information from this publication is reproduced in the present document:

(a) The announcement by United States Trade Representative Carla A. Hills of the results of the 1990 Annual Review of the Generalized System of Preferences (GSP);

(b) The United States GSP Country Practice petition decisions;

1/ However, petitions granted to Hungary, Poland and Yugoslavia will be implemented from 1 May 1991.

GE.91-51248/0987H

(c) Supplemental materials on the 1990 GSP Annual Review:

(i) Brief overview on the United States GSP;

(ii) Summary of annual product changes in the GSP and annexes:

I. New products added

II. Products removed from the list of GSP eligible items

III. Beneficiaries graduated from the list of GSP eligible items

IV. GSP countries eligible for redesignation

V. GSP countries eligible for the minimum waiver

VI. GSP countries exceeding competitive need limits

VII. Countries granted waivers of competitive need limits on certain products

VIII. Product decisions with 1 May 1991 implementaion and 1990 East Europe imports.

HILLS ANNOUNCES RESULTS OF 1990 GSP ANNUAL REVIEW

United States Trade Representative Carla A. Hills today announced the results of the 1990 annual review of the Generalized System of Preferences (GSP).

The GSP grants duty-free access to the United States to certain goods from developing countries.

The review provides $337 million in new benefits and $1.1 billion in restored and in so-called continued benefits: benefits to countries that would have been excluded had not the discretionary authority granted to the President allowed them to remain eligible. GSP eligibility is being removed for imports valued at $550 million.

The review provides GSP benefits to 134 countries. Last year, imports valued at $11.1 billion entered the United States duty-free under GSP.

More than half of the new benefits will go to four East European countries: Czechoslovakia, Poland, Hungary and Yugoslavia.

"GSP continues to be an effective stimulant to the economies of developing countries and emerging democracies," Hills said. "It also serves to help integrate the economies of these countries with those of the world's trading nations. The United States wants the people of these countries to reap the benefits of full membership in the world trading system. Participation in GSP is an important part of this process."

Two products - linear alkybenzenes and ibuprofen - were removed because of GSP statutory requirements related to the products' impacts on United States producers. Linear alkyenzenes are being removed for all beneficiaries. Ibuprofen is being removed for India after a review of GSP standards, including those regarding intellectual property rights and the potential impact on United States producers. Seventeen other products were removed because they exceeded GSP competitive need limits.

Requests for expanded GSP coverage through competitive need waivers by Mexico and the Philippines are being deferred until June to allow full consideration of their intellectual property rights practices, as required by the GSP statute.

The annual review considered petitions to determine whether eight beneficiaries meet GSP worker rights criteria. It was determined that Benin, the Dominican Republic, Haiti and Nepal have taken or are taking steps to afford their workers internationally recognized worker rights. Sudan was found not to meet this standard and will have its GSP benefits suspended indefinitely. Reviews of the worker rights practices of Bangladesh, El Salvador and Syria will be extended one year.

One United States firm asked that a review be conducted to determine whether Peru is meeting its obligations to provide prompt, adequate and effective compensation for nationalized properties. This review is being continued for up to one year.

Petitions granted to Hungary, Poland and Yugoslavia will be implemented 1 May 1991; Czechoslovakia will be eligible to receive GSP duty-free treatment immediately. All other changes will become effective 1 July 1991.

A Brief Overview of the U.S. GENERALIZED SYSTEM OF PREFERENCES (GSP)

The Generalized System of Preferences (GSP) is an autonomous and temporary program of duty-free tariff preferences granted by the United States to developing countries. The primary purpose of the GSP is to promote the economic growth and industrialization of beneficiary developing countries and promote the notion that trade, rather than aid, is a more effective and cost-efficient way of promoting broad-based, sustained economic development. As a result, the GSP continues to be administered in a manner which recognizes that beneficiary developing countries and territories often need temporary preferential advantages to compete effectively with industrialized countries in the United States market.

Twenty-six other developed nations also have GSP programs, including the European Community, Canada, Australia, the Nordic countries, Japan, and the East European nations.

The United States offers, under its Generalized System of Preferences (GSP), preferential duty-free entry to approximately 4,290 products from 134 designated beneficiary countries and territories. GSP imports from current beneficiaries totaled $11.1 billion in 1990, an increase of 11 percent over 1989. This represents 12 percent of all beneficiary imports and 2.2 percent of total 1990 U.S. imports.

The GSP program was instituted on 1 January 1976, and was authorized under the Trade Act of 1974 for a ten-year period. The program was renewed through 4 July 1993 by the Trade and Tariff Act of 1984.

The GSP is also designed to encourage developing countries to further integrate their economies into the international trading system (GATT), with its attendant responsibilities, in a manner commensurate with their level of development. Most significantly, the law is designed to encourage beneficiary developing countries and territories to: (1) provide equitable and reasonable market access; (2) eliminate or reduce significant barriers to trade in services and investment; (3) provide effective means by which foreign nationals may secure, exercise, and enforce exclusive intellectual property rights; and (4) afford workers internationally recognized worker rights. Within the GSP program, these are referred to as "country practices".

An important attribute of the U.S. program is its ability to adapt and adjust on a product-specific basis to changing market conditions and the changing needs of producers, workers, exporters, importers and consumers. Modifications to the list of articles eligible for duty-free treatment are made through an Annual Review procedure. This ten-month process begins each June

1[1], the filing deadline for petitions requesting a change in eligibility, and concludes on or about 1 April the following year with the announcement of the President's decisions, which are implemented on 1 July.

Any interested party can file a petition. Product petitions are generally filed by a U.S. or foreign industry or trade group, or a beneficiary country. Country practice petitions, which request that a review be conducted to determine if a country meets the eligibility standards specified by the particular practice. Petitions regarding worker rights are usually filed by labor or human rights groups; businesses usually file expropriation, market access and intellectual property rights petitions. To date, no petitions have been filed regarding investment standards. The petition process includes public hearings and written comment periods, and economic advice provided by the U.S. International Trade Commission.

Product petitions filed in an Annual Review may request that a product be added to or removed from the list of those eligible for duty-free treatment. An interested party may also request that a beneficiary country receive a waiver for those products which exceed the statutory ceilings of the program, knows as competitive need limits. Under the statutory competitive need provisions, a country loses GSP duty-free treatment for a product if its shipments of the product in the preceding calender year equaled or exceeded 50 percent of the value of the total U.S. imports of the product (25 percent in the case where a country has been found sufficiently competitive in the product) or a certain dollar amount during the preceding calender year ($92,731,530 for 1990, or $36,205,660 in the case where a country has been found sufficiently competitive in the product). Each of the competitive need limits were set by Congress, and are adjusted each year to reflect growth in the U.S. economy.

Other modifications are automatically made each year to the list of eligible products and cannot be requested through a petition. However, each January a Federal Register notice is published inviting comment on the articles expected to require a decision. Such decisions include the exclusions of products which exceed the competitive need limits and the redesignation, or reinstatement, of individual developing countries for GSP benefits in specific items. Redesignation can occur only when a beneficiary country has previously exceeded the statutory "competitive need limits" and in the following year falls below these limits. Once a country falls below the limits, they become eligible for redesignation.

In addition, the de minimis provision allows the President to waive the 50 percent competitive need limit in cases where

---

1 1 June falls on a Saturday in 1991. Petitions will be due on Tuesday, 4 June this year.

total U.S. imports of an item in 1990 did not exceed $10,890,279, a limit also established by Congress and adjusted annually.

On the basis of country practice petitions from the private sector the President also examined the worker rights practices of a number of countries during the course of the review. By law, the President must terminate or suspend the GSP eligibility of a beneficiary if he finds that it is not taking steps towards providing internationally recognized worker rights to its workers. This requirement was added to the law when the GSP program was renewed in 1984. The law defines internationally recognized worker rights to include:

1) freedom of association,
2) freedom to organize and bargain collectively,
3) a prohibition on the use of forced or compulsory labor,
4) a minimum age for the employment of children, and
5) acceptable conditions of work with respect to minimum wage, hours of work and occupational safety.

A worker rights review considers the full range of worker rights practices noted above, and is not limited to allegations made by petitioners. USTR works with Embassy personnel and other responsible officials to collect and evaluate information.

A more detailed description of the GSP program can be found in The President's Report to Congress on the Generalized System of Preferences (February, 1990), available on request from the USTR Reading Room.

Revised: 4/91

SUMMARY OF ANNUAL PRODUCT CHANGES IN THE GENERALIZED SYSTEM OF PREFERENCES (GSP)

1. Changes resulting from the 1990 GSP Product Review

The addition of new products to the GSP list -- As a result of the GSP product review, 59 new items are being designated for GSP duty-free treatment, effective July 1, 1991. As noted below, certain decisions are being implemented on May 1. The 59 items represent $336.6 million in newly-eligible trade from 45 beneficiaries. (See Annex I and Table 1.)

The removal of products from the GSP list -- As a result of the GSP product review, one product is being removed from GSP eligibility effective July 1, 1991 in response to a petitions filed by U.S. industry. One additional product is being removed from India as the result of a request from U.S. industry. The value of currently GSP eligible trade that will lose GSP eligibility as a result of these decisions was estimated for 1990 at $5.7 million from 5 beneficiaries. (See Annexes II and III and Table 2.)

The waiver of competitive need limits for countries with respect to an individual product -- The currently applicable competitive need limits will be waived for 5 products when imported from Malaysia, Poland or Yugoslavia. Originally set at $25 million or 50 percent of all U.S. imports by the Trade Act of 1974, the dollar value competitive need limit established for imports in 1990 is $92,731,530 (a lower limit of $36,205,669 or 25 percent of all U.S. imports applies where a country has been found sufficiently competitive with respect to a product). All beneficiaries will have the percentage competitive need limit waived for four products that have been determined not to be manufactured in the United States, as provided by Section 504(d) of the GSP statute. Competitive need waiver decisions regarding Mexico and the Philippines have been pended for further review. Decisions on these petitions will be announced before the date such waivers would become effective, July 1, 1991. (See Annex VII and Table 7.)

2. Other modifications

Redesignation of individual beneficiary developing countries for GSP benefits in specific items -- Individual countries previously excluded from receiving GSP duty-free treatment for particular products may be redesignated for GSP benefits if their 1990 shipments in individual items fell below last year's competitive need limits. Under this provision developing countries are being redesignated for GSP duty-free treatment on 27 products valued at $303 million, which represents 35 percent of the total amount of trade eligible for redesignation. The remaining items, valued at $569 million, are being graduated and thus are not being redesignated. (See Annex IV and Table 4.)

De minimis exemptions from the percentage competitive need provision -- A de minimis provision in the Trade Agreements Act of 1979 allows the President to waive the percentage competitive need limit in cases where total U.S. imports of an item in 1990 did not exceed $10,890,279. As a result of the de minimis provision, imports of 217 products valued at $402 million from individual beneficiaries will be exempt from the percentage competitive need rule. Trade in 19 items with a value of $53 million was not granted a de minimis waiver. (See Annex V and Table 5.)

The exclusion of exports of individual countries from GSP duty-free treatment for certain products because the competitive need ceilings were exceeded -- Under the statutory competitive need provisions, a country loses GSP duty-free treatment for a product if its shipments of the product in the preceding calendar year equaled or exceeded the applicable competitive need limits described above. Competitive need exclusions total approximately $8.8 billion based on 1990 trade. Of this amount, $544 million consists of trade in items where a beneficiary is losing eligibility for the first time. These totals exclude trade granted competitive need waivers as part of this review (three products). Several of these products have competitive need waiver decisions pending for Mexico and the Philippines. (See Annex VI and Table 6.)

Accelerated implementation of decisions affecting Czechoslovakia, Hungary, Poland and Yugoslavia -- As announced by the President on March 20, 1990, 25 product decisions of special interest to Czechoslovakia, Hungary, Poland or Yugoslavia are being implemented on May 1, 1991. All other decisions become effective July 1, 1991. Early implementation of the 24 product additions will make the product eligible for duty free treatment from all beneficiaries; the competitive need waivers on hams and sulfa drugs are country specific. (See Annex VIII.)

ANNEX I: NEW PRODUCTS ADDED TO THE GSP AS A RESULT OF THE 1990 ANNUAL PRODUCT REVIEW AND 1990 TRADE

Current HTS	New HTS (When Applicable)	Description	MFN Tariff	GSP Eligible Imports	
0202.30.20		frozen fancy retail beef	4.0	$5,906,305
